

Data handling policy statements (relative to empiric network data collection) broken down to atomic statements

Device: POINT Dusty520WET Robot Vacuum

Privacy Policy link: <https://app-h5-us.iotbing.com/developerapp/protocol/1a824d962b40000b?lang=en>

Decomposition: Actor-Action-Data Object-Entity

1.

“What Personal Data Do We Collect?”

In order to provide the Services to you, we will ask you to provide necessary Personal Data that is required to provide those Services. Please note that such Personal Data are necessary for carrying out relevant Services that you may require and you are obliged to provide such Personal Data in order to use our Services. If you do not provide your Personal Data, we may not be able to provide you with the Services.”

Volcano Technology Limited – collects – personal data – for services

2.

“1) Information You Voluntarily Provide to Us

In Login mode:

- *Register account information: When you register an account with us, we will collect your account name and contact information, including your email address, phone number, user name and login credentials. During your interaction with our products, we will further collect nicknames, country codes, language preferences or time zone information in your account.”*

Volcano Technology Limited – collects – user information – for services

3.

“When you choose to authorize the use of a third-party account to log in, we will obtain your shared account information (name, email address, profile picture etc.) from the third party and bind it to your SmartLife account for quick login. We will use your personal information in accordance with the agreement with the third party and the terms of sharing personal information in the privacy policy published by the third party, subject to compliance with relevant laws and regulations.”

Volcano Technology Limited – collects – user information – from third party login

4.

“Additional functions based on location information:

When you enable the location-based functions through permission settings on your mobile device, we will collect and process your location information to enable these functions, such as pairing with your Smart Devices. Also, we may collect information about you: a) real-time and precise location, for instance when you choose to use the automation scenarios for controlling your Smart Devices, or b) non-precise geo-location when you use certain Smart Devices or the Services, such as robot cleaner and weather service.”

Volcano Technology Limited – collects and processes – location data – for services

5.

“Please note that if you turn on any permission, you authorize us to collect and use relevant personal information to provide you with corresponding Services.”

Volcano Technology Limited – collects and uses – personal information – for services if prohibited

6. & 7

”2) Information We Collect Automatically

Mobile device information: When you interact with our products, in order to ensure your normal use of our services, maintain the normal operation of our services, improve and optimize our service experience, and protect your account security, we will automatically collect mobile device information , including mobile device model, login IP address, wireless connection information, operating system type and version, application version number, push notification identifier, log files and mobile network information. At the same time, we will collect your software version number. To accurately identify the source of a service failure, we will collect your ID-related information (including account ID, device ID, order ID, home ID, and scene ID). To ensure the security of the operating environment or as needed to provide services, we collect information about the mobile applications and other software you use, as well as the application's application installation list (for the purpose of application performance monitoring).

Service log information: When you use our application, in order to provide you with a better user experience and improve and optimize our services, system and exception logs will be uploaded for analysis, including your IP address, usage habits, The version of the operating system, the date or time of access, and usage information allow us to accurately identify problems and help you solve problems when using the service.”

Volcano Technology Limited – collects – mobile device information – for services

Volcano Technology Limited – collects – system and exception logs – for product enhancements

8., 9., 10. & 11.

“3) Smart Devices Related Information:

When you use a Smart Device, we will collect some basic and pre-embedded information of the Smart Device and the information generated during your use of the Smart Device.

- Basic Information of Smart Devices: When you connect your Smart Devices with the Services, we may collect basic information about your Smart Devices such as device name, device ID, online status, activation time, firmware version, and upgrade information.*
- Information collected during the process of connecting smart devices: When using SmartLife APP and services, in order to facilitate device identification/activation/control, perform data statistics and analysis, and ensure the safety and quality of network access and service operations, we will use the products according to your use. When performing specific operations, we will receive and record information related to the device you are using based on the type of smart device you need to connect to. We will collect the following information: Wi-Fi information (SSID, BSSID, Wi-Fi Mac address, Wi-Fi password), device Mac address, device ID, device IP, device Bluetooth Mac address. To ensure timely detection and connection of nearby smart devices, even when the application is running in the background during the network configuration process, we will continuously scan and process Bluetooth or Wi-Fi signals at necessary and appropriate intervals.*
- Information Reported by Smart Devices: Depending on the different Smart Devices you elect to connect with the Services, we may collect different information reported by your Smart Devices. For example, a smart light may report brightness and color temperature, while a dehumidifier may report temperature and humidity. You can view device data within the App interface or export it via the privacy settings page. The following information reported by the Smart Device only applies when you use them:”*

Volcano Technology Limited – collects – smart device information – for service enhancement

Volcano Technology Limited – receives and records – device and network information - for service operations

Volcano Technology Limited – collects – Bluetooth and Wi-Fi signals – in intervals

Volcano Technology Limited – collects – smart device specific information – for service enhancement

12., 13., 14., 15. & 16.

Improving and Securing of Our Services: We process your mobile device information, usage data, location information and Smart Device related information to the functionality of our products, develop and improve our products and services, and analyze our operational efficiency. Concurrently, to ensure the security and stability of our products and services, and to prevent and track fraudulent or inappropriate use, we will process the aforementioned information about you.

Volcano Technology Limited – processes – mobile device information – for services

Volcano Technology Limited – processes – usage data – for services

Volcano Technology Limited – processes – location information – for services

Volcano Technology Limited – processes – smart device information – for services

Volcano Technology Limited – processes – user information – for services

17.

“Service Maintenance & Improvement Activity: In order to analyze the usage of the products we provide and improve your user experience, we may analyze the data you provide us, a) we need to check your problems when you encounter any malfunctions during the usage of the product, b) analyze data about how you interface with the product or under particular scenarios so that you can better enjoy the convenience brought by our Services.”

Volcano Technology Limited – analyzes – user behavior – for service enhancements

18., 19. & 20.

“Marketing Communication and Personalization: We may process your account data, usage data, device information to personalize product design and to provide you with services tailored for you, such as recommending and displaying information and advertisements regarding products suited to you, and to invite you to participate in surveys relating to your use of the Services.”

Volcano Technology Limited – processes – account data – for personalization

Volcano Technology Limited – processes – usage data – for personalization

Volcano Technology Limited – processes – device information – for personalization

21., 22. & 23.

“Who do We Share Personal Data with?

At Tuya, we only share Personal Data in ways that we tell you about. Without your consent, we will not disclose your Personal Data to third-party companies, organizations, or individuals except in the following cases:

- To our third-party service providers who perform certain business-related functions for us, such as website hosting, data analysis, payment and credit card processing, infrastructure provision, IT services, customer support service, e-mail delivery services, notification pushing services and other similar services to enable them to provide services to us.*
- To providers of Smart Devices that may provide, directly or indirectly, Smart Devices to you, and/or networks and systems through which you access and use our websites and services.*

- *To subsidiaries or affiliates within our corporate family for purpose of regular business activities based on our instructions and in compliance with applicable law, this Policy and other appropriate confidentiality and security measures.*
- *To an affiliate or other third party in the event of any reorganization, merger, sale, joint venture, assignment, transfer or other disposition of all or any portion of our business, assets or stock.*
- *Sharing with third-party advertising and analytics partners. To provide you with more relevant, personalized programmatic ads (such as banner ads) in our app, we may share or disclose certain information about you, such as device identifiers (like IDFA/GAID), IP addresses, approximate location information, or in-app interaction data, to third-party advertising networks (such as Google) and advertising service providers. These third parties may use this information, combined with data they collect from other websites or apps, to deliver ads tailored to your interests.”*

Volcano Technology Limited – transfers – personal data – to third parties

Volcano Technology Limited – transfers – personal data – to service providers

Volcano Technology Limited – transfers – personal data – to affiliates

Volcano Technology Limited – transfers – personal data – to advertising and analytics partners

24.

“To ensure the proper functioning of the App or to implement specific independent features, we may embed third-party SDKs within the App. Please note: The types of personal data processed by these third-party SDKs may change at any time due to upgrades, updates, or policy changes. You should refer to the latest relevant information provided on the official websites of such third parties or through other means. Furthermore, when you use services provided by third parties, we will ensure that sharing your personal information with such third parties is based on their obtaining your authorization and/or consent, or complies with other requirements of applicable laws and regulations. We will also strive to manage any information sharing with such third parties to protect the security of your relevant personal information. For detailed information regarding information sharing with these SDKs and other third parties, please refer to the "List of Personal Information Shared with Third Parties". We recommend that you carefully read the privacy policies of any third parties with whom you interact.”

Volcano Technology Limited – transfers – personal data – to third party SDKs

25.

“Data Transfer

Volcano operates globally, and Personal Data may be transferred, stored and processed outside of the country or region where it was initially collected. Also, the applicable laws in the countries and regions where we operate may differ from the laws applicable to your country of residence (please kindly check [Global Data Center](#) accordingly). Under the Personal Data protection framework and in order to facilitate our operation, we may transfer, store and process your Personal Data in jurisdictions other than where you live.

We protect Personal Data in accordance with this Policy wherever it is processed and take appropriate contractual or other steps to protect it under applicable laws.

The European Commission has determined that certain countries outside of the European Economic Area (EEA), the UK or Switzerland can provide adequate protection of Personal Data. Where Personal Data of users in the EEA, Switzerland, or the UK is being transferred to a recipient located in a country outside the EEA, Switzerland, or the UK which has not been recognized as having an adequate level of data protection, we ensure that the transfer is governed by the European Commission's standard contractual clauses. You can review the agreement on the basis of approved EU standard contractual clauses per GDPR Art. 46. For more information, see [here](#).

Also, when we transfer data to our processors, the data may be transferred outside the EEA, For details on such third parties information sharing, please see "List of Third-party Information Sharing".

Volcano Technology Limited – transfers – personal data – across borders

26.

- “As for data communication, communication using security algorithms and transmission encryption protocols and commercial level information encryption transmission based on dynamic keys are supported.”
- “As for data processing, strict data filtering and validation and complete data audit are applied. As for data storage, all confidential information of users will be safely encrypted for storage. If you have reason to believe that your interaction with us is no longer secure (for example, if you feel that the security of any account you might have with us has been compromised), you could immediately notify us of the problem by emailing dpo@volcano-smart.com.”
- “As for data storage, all confidential information of users will be securely encrypted for storage.”

Volcano Technology Limited - encrypts and secures – user and device information – for safety purposes

27., 28. & 29

“EU Data Act Transparency

1. Identity of the Data Holder

Tuya GmbH (hereinafter referred to as “we” or the “Data Holder”) is the provider and operator of SmartLife. When users use our products and related services, the devices generate and process data.

Contact details:

l Organization name: Tuya GmbH

l Address: Peter-Müller-Straße 16/16a, 40468 Düsseldorf, Germany.

l Contact details: 1-844-672-5646 or dpo@volcano-smart.com

2. Types and Attributes of Generated Data

Our services may generate product status data, usage logs, user operation data, service events, automation scenario data, and more.

Product Data Attribute Description :

l Data content: Product status data and usage logs

l Data format: Collected in JSON format; stored in MySQL tables; exportable in XLS format

l Collection frequency: Real-time or event-triggered

l Data volume: 0.01MB–5MB per day (approx. 50 MB for IPC devices)

l Continuous generation: Only when events occur or device states change

Service Data Attribute Description:

l Data content: User operations (e.g., changing settings, binding/unbinding devices, turning devices on/off, triggering automation, adjusting temperature or brightness) and service events (e.g., application usage logs, timestamps of activities, purchase or renewal records)

l Data format: Collected in JSON format; stored in MySQL tables; exportable in XLS format

l Collection frequency: Triggered when users interact with the app or automation scenarios run

l Data volume: 0.01MB to 0.5MB per day, depending on usage intensity

l Continuous generation: Only upon user operation or automation triggers”

Tuya GmbH – holds - data – in EU

Tuya GmbH – collects – product data – in EU

Tuya GmbH – collects – user operation data – in EU

30. & 31.

”Product Data Types and Quantities”

Product Type	Data Types (Examples – actual data types can be checked on IoT platform)	Daily Volume (mainly status reporting; may increase with frequent adjustments)
Sockets/Switches	On/off status, countdown, network parameters, connection status, device configuration	~168KB

Product Type	Data Types (Examples – actual data types can be checked on IoT platform)	Daily Volume (mainly status reporting; may increase with frequent adjustments)
Lighting Products	On/off status, brightness, color temperature, color, dynamic effects, network parameters, connection status, device configuration	~15KB
Major Appliances (ACs, water heaters, refrigerators, etc.)	Power on/off, volume, operating time, water amount/pressure, fan speed, temperature, humidity, swing angle, energy consumption, connection status, device configuration	~3.75MB
Small Appliances (robot vacuums, humidifiers, air purifiers, etc.)	Speed, cleaning area, consumable life, volume, brightness, PM2.5, temperature, humidity, water level, eCO2, network parameters, connection status, device configuration	~979KB
Sensors	Brightness, distance, noise, color temperature, wind speed, temperature, humidity, pressure, flow rate, pH, liquid level, position, PM2.5, CO, CO2, formaldehyde, network parameters, connection status, device configuration	~717KB
Industrial/Agricultural Sensors (valves, temp/humidity sensors, etc.)	Temperature, humidity, irrigation time, water consumption, network parameters, connection status, device configuration	~4.14MB
IPC Products	Audio/video, images, motion detection events, connection status, device configuration	~50MB (depends on bitrate and reporting frequency)
Health/Wellness Products (wearables, body fat scales, etc.)	Heart rate, steps, sleep, body temperature, blood oxygen, activity trajectory, location, network	~464KB

Product Type	Data Types (Examples – actual data types can be checked on IoT platform)	Daily Volume (mainly status reporting; may increase with frequent adjustments)
	parameters, connection status, device configuration	
Mobility Products (e-scooters, e-bikes, etc.)	Speed, brightness, mileage, temperature, network parameters, connection status, device configuration	~521KB

Tuya GmbH – collects – environmental data – from small appliances

Small appliances – status reports – 979 KB environmental data – to Tuya GmbH

32.

“Data is stored on remote servers located within the European Union (Germany).”

Tuya GmbH – stores – data – in Germany

33. & 34.

“We use data only for fulfilling contracts, security, troubleshooting. Data is shared only with service providers acting as data processors for business purposes”

Tuya GmbH – uses – data – for contracts, security and troubleshooting

Tuya GmbH – shares – data – with service providers
